"Times, of Course"

That's what all the newsboys say when asked which Barre paper sells the best. There is no doubt about it.

St. Albans and Rutland are having an interesting time discussing which is the more wicked. The Messenger of the railroad city recently named Rutland "Vermont's Sodom" because of its record of drunks. Now The News of the marble city throws back the epithet because of the St. Albans "Blocks." The facts of the case are that neither city is in a position to throw stones lest broken glass should follow.

Regarding the outcome of the Wilson-Clement slander suit, the Rutland Herald, the latter's organ, says: "It was commonly believed when Wilson brought his \$50,000 suit against Mr. Clement that it was a political move; and this assumption at the time seemed reasonable enough. But in view of the sorry showing of the plaintiff and all the circumstances attending this litigation, it is evident that the case is no child of any political household we know of in this state. No political boss would care to trifle with such dangerous materials. It is rather a legitimate outcome of the Anti-Saloon league movement, and it has earned its inglorious fate."

So Horace W. Bailey, "the gentleman from Newbury," is to fill the place of United States marshal for Vermont—a place made vacant by the removal of Fred A. Field of Rutland. Marshal Bailey promises not to let any Chinamen slip through his fingers, and if he does, or is guilty of any other dereliction in his official duties, he may expect a summary dismissal such as was given Mr. Field. The importance of fidelity to duty must be forced home upon all government office holders and the strongest lesson is the one meted out to Mr. Field. No matter how good an officer the latter may have been and how faithful to his duties, it was necessary for the president to remove him from office for the good of the service at large. If the dereliction had gone unpunished in this case then other officers in the government service might expect the same freedom of censure wherewith to be guilty of any wrong doing in office. Hence the summary dismissal of F. A. Field.

Richard Crocker of the big Union Tailoring House of New York, the Kahn-Feinberg Co., will be at A. A. Smith & Bros.'s store on Friday and Saturday and at Graniteville next Monday and Tuesday, to take measures for suits, trousers and overcoats, from the latest in woolsens. ABOUT THE STATE.

Items of Interest Gleaned From Our Exchanges.

Fire in Readsboro yesterday morning burned the building recently occupied by G. Ghiesche, as a bakery and residence, only one empty trunk being saved. Ghiesche, who had but recently purchased the property, had made extensive improvements on it. The loss is \$2,000, partially insured.

Mrs. Henry Severance of Montpelier has received the personal effects of Max E. Severance, her son, which came from the Philippines on the same steamer with Mr. Severance's body. Mr. Severance had made quite a collection of native instruments, including swords, daggers, knives and bolos.

There is but little change in the condition of J. F. Manning, who received a shot wound in his eye while hunting at Brandon Monday. The shot passed through the upper lid and the upper part of the globe of the eye. The shot has not yet been located. It is feared that the sight of the eye will be destroyed.

Bert Moody, who formerly drove the stage between Chelsea and West Fairlee, but recently has boarded at the Lake house in Post Mills, committed suicide by shooting himself Thursday afternoon, Oct. 15. He made an excuse that he was going hunting but not returning the next day or Saturday a search was made Sunday and his body was finally found. He was a young man of good habits but somewhat eccentric and had made threats towards others. Among his effects were discovered a bank book recording a deposit of \$2,700 and \$250 in cash.

D. F. Goodrich of Brandon, lost all of a flock of 14 hens in a peculiar manner Tuesday night. The hens were locked securely that night as usual in a house which was considered proof against animals as well as man. Wednesday morning, however, when he unlocked the building it was to find his 14 hens distributed over the floor each and everyone minus its head, evidently done by some animal as the necks were chewed in ribbons but what manner of animal it was a mystery. The most probable solutions is that rats were the cause.

Equal Distribution of Space!

Now Listen to This!

A perfect Shoe should contain not a single particle of space more than necessary, otherwise the Shoe becomes large and ungainly. The Dorothy Dodd Shoe leaves more space for the foot than any other Shoe we know of, yet the Shoe itself is absolutely smaller than the ordinary Shoe. That is because it equally distributes space.
